ACC Suraksha Power Plus Cement

This cement comes from the house of ACC , which in the last 85 years, has mastered the technology of manufacturing the right quality of clinker and has created the perfect blend with fly-ash and/or slag to produce the best-in-class cement.

This is a Creative Visualization.

INDIA'S 1ST CEMENT COMPANY

Features :

Our R&D team has engineered the right range of cement particles having triple advantage – better dispersion, faster reaction and denser packing.

USPs

SUPERIOR STRENGTH

Enjoy long lasting strength with a cement that ensures perfect primary and secondary hydration reaction from each and every particle of the cement.

ENHANCED DURABILITY

Superior clinker with right blend of fly-ash / slag produce strength multiplier particles that provide durability to your home.

PEACE OF MIND

With superior Strength and enhanced durability enjoy peace of mind forever.

Areas of application :

All Application Cement - Be wiser and get 100% protection by choosing ACC Concrete plus cement in all the applications of home building

FOUNDATION CONCRETE

Safeguard the foundations of your home against water percolation and movement of chlorides, sulfates and other harmful salt formation in the long run.

WALLS (INTERNAL / EXTERNAL) & CEILING PLASTER

Protect your home from salt efflorescence in walls plastering and enjoy healthy indoor living conditions.

BEAMS & COLUMNS

Ensures water molecules do not seep up to the reinforcement bars and cause steel corrosion, which makes for a stronger and sturdy structure.

SLAB CASTING

Protect your home against free flowing, corrosion causing water molecules, making the structure safer and more durable.

BRICK MASONRY

Enjoy excellent workability of cement mortar and carry out masonary work with ease. Save on material and labor costs due to less rebound loss.
